

Load Protection Shock Absorbers:

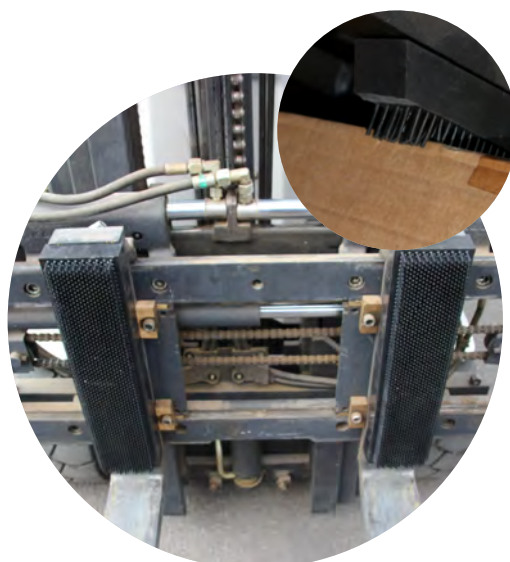

A safe and simple way to save £££s

Magnetically attached blocks, placed either vertical or horizontal, cushions the impact of forks and load guards.

Prevent a single pallet of damaged goods and the investment is recovered.

Save just one a month and add £££s to your bottom line.

Suitable for all makes of counterbalance, stackers, pallet and reach trucks.

Model	Length (mm)	Width (mm)	Height (mm)	Type
IDSA 400/50/50	400	50	50	4 magnets, upper fibre layer 3mm diameter
IDSA 420/125/50	420	125	50	5 magnets, 3mm diameter L-profile on edge
IDSA 450/100/50	450	100	50	5 magnets, upper fibre layer 3mm diameter, L-profile on edge
IDSA 540/125/50	540	125	50	5 magnets, upper fibre layer 3mm diameter, L-profile on edge

Model – IDSA 400/50/50

Specification: Magnetic blocks designed for attaching to fork uprights (vertical) and load guards (horizontal).

Soft fibrous co-polymer bristles prevents damage to goods caused by forks and even spreads the load impact. Dimensions : 400x50x50mm, 5 magnets, upper fibre layer dia 3mm.

Standard Features

- Weight 1Kg
- Good chemical resistance
- Magnetically attached (39Kg pull force)
- Material: co-polymer 70° shore A
- Overall strength: >13 MPa
- Elasticity: 300%
- Temperature range: -40°C to 100 ° C

Also available with L-profile edge (420x125x50mm, 450x100x50mm or 540x125x50mm)
