

Product ID:

RGL16

Product Name:

Twin Leg Adjustable Webbing
Lanyard & Shock Absorber

The RGL16 is a twin leg fall arrest lanyard; the extra leg allows movement between anchorage points by means of double clipping. This system is generally used for tower climbing, steel erecting, scaffolding and maintenance on open structures.

When used in conjunction with two girder slings (RGK26), the RGL16 can be used as a means of progression through suitable structures where no fixed lifeline or eye-bolts are available. The lanyard length can be adjusted to suit the application. Potential trip hazard can be avoided and potential free fall distance can be reduced which is less possible with a non-adjusting lanyard.

Accredited to:

EN 355:2002

Material:

26mm water repellent polyester

Fittings:

2 x steel adjusters and RGK1

Length(s):

1.2m - 1.8m

Features:

Shock Absorber

Steel Adjusters
