

PRODUCT SPECIFICATION

ActionRam Hydraulic Toe Jacks

The ActionRam range of hydraulic toe jacks is the premium product line of LiftinGear, engineered to the highest standards for superior performance, reliability and safety. Precision-designed for professional use, each jack features dual lifting points, a low-profile toe, and rugged construction, ideal for lifting heavy equipment in tight industrial, warehouse, or construction spaces.

SUMMARY

- Effortless hand operation for quick and simple use.
- Dual lifting points on toe and head provides added versatility.
- Low height lifting toe allows working in confined areas.
- Mold-cast alloy steel toe ensures superior durability.
- High strength return spring enables rapid ram retraction.
- Swiveling pump handle for multi-angle access.
- Internal overflow valve functions as a stroke limiter.
- Convenient carry handle.
