

PRODUCT SPECIFICATION

IM300 Portable Roof Man Anchor

The IM300 Portable Roof Man Anchor is a modular, fully certified fall protection solution designed for safe work on flat roofs with a maximum pitch of 5°.

With 12 rubber weights and a central anchor post, it offers portability, quick setup, and weather resistance. Ideal for contractors and maintenance teams, the IM300 provides secure fall arrest or restraint without roof penetration, ensuring safety, efficiency and long-lasting performance.
