Tool Safety Lanyard "Economy" 4kg

Expanding bungee tool lanyard - stops tools and equipment falling from height

4 kg — Safe working load

66 cm — Effective working length

0.1 kg — Product weight

OVERVIEW

A bungee-type expanding tool lanyard designed to stop hand tools and equipment falling from height and injuring people below. A carabiner on the end makes it quick to clip to a belt or harness point, and the Economy model gives you a quality tool tether at a price that makes kitting out a whole team practical.

FEATURES & BENEFITS

- **Expanding bungee** stretches with the user's reach, then retracts out of the way
- **Carabiner supplied** for fast belt or anchor-point attachment
- **Rated to 4 kg** - covers most hand tools and power-tool accessories
- **Lightweight at 0.1 kg** - no noticeable burden on the user
- **Economy model** - a cost-effective way to equip a whole team

TYPICAL APPLICATIONS

Scaffolding and roofing · steel erection · MEWP and platform work · wind turbine and telecom towers · event rigging · industrial maintenance at height

Product code	**TSTL1**
Brand	**Tool-Safe**
Type	**Bungee tool lanyard**
Safe working load (SWL)	**4 kg**
Effective working length	**66 cm**
Connector	**Carabiner (supplied)**
Product weight	**0.1 kg**
Tools included	**No - lanyard only**

WHY TETHER TOOLS?

Even a small hand tool dropped from height can cause serious injury to people working below and damage to plant and equipment. Tethering tools is a simple, low-cost control that supports dropped-object prevention on any site where work is carried out above others.

Important: Tools are not included. Do not exceed the 4 kg safe working load. This is a tool tether, not personal fall protection - never use it to secure a person. Inspect the cord, stitching and carabiner before each use and withdraw from service if damaged.
