

GOTCHA EVAC II

Height Safety
Lifting
Load Control
Safety Management

Product Name: GOTCHA EVAC II

Order Code: GOTCHA EVAC II

What is it?

(Product Description):

Pre-assembles emergency evacuation kit. The kit contains an anchor sling, 20m rope and D2 friction descending device.

What can it be used for?

(Intended Function):

This is an evacuation kit for emergency escape from platforms, plant and vehicles. It is ideal for emergency escape in applications like Very Narrow Isle Trucks.

What can I use with it? (Compatibility):

The GOTCHA EVAC II is compatible with the following equipment and their associated systems;

- 2-X Harness
- Casualty Harness
- CLIMA-TECH Harness
- MEWP-PRO Harness

If you are unsure of any equipment and its compatibility with the GOTCHA EVAC II please contact SpanSet Ltd.

Who can use it?

(Competence, Size and Adjustment):

Work at height can be a high risk activity. It is therefore essential that all users are competent in the pre use inspection, fitting / adjustment and use of this item.

The GOTCHA EVAC II is rated for workers up to 100kg in weight.

For workers over 100kg we recommend the GOTCHA ADD PLUS.

How long will it last?

(Maintenance, Inspection and Lifespan):

The lifespan of the GOTCHA EVAC II is limited by the following;

The product has a maximum shelf-life of 10 years from the date of manufacture.

The product has a maximum service-life of 5 years from the date of first use.

The lifespan may also be reduced by the effects of damage or wear and tear.

The lifespan will cease at the point when any one of these conditions is met.

The condition of the product must be controlled in accordance with BS8437:2005, this requires regular inspections to be carried out by a competent person.

GOTCHA EVAC II

How has it been tested?

(Relevant Standard and Quality Assurance):

The GOTCHA EVAC II is CE marked under the Personal Protective Equipment Directive. The CE marking process includes independent testing to EN12841 – Personal protective equipment against falls from height – rope adjustment devices. The SpanSet manufacturing process is quality controlled and audited by the British Standards Institute to the international standard for quality management ISO9001:2008.

What is it made from and why? (Specification and Materials):

- 8mm rope making the kit compact
- Aluminium device for reduced weight
- Anti-panic function to prevent uncontrolled descent
- Pre-assembled for emergency use

Additional SpanSet Features:

Individual Serial Numbering – All SpanSet Height safety products are individually serial numbered for traceability.

What paperwork is supplied?

(Product Records and Information):

Multilingual Instructions with pictorial fitting guide
Individual Product History Card – This record card contains all the documentation required to maintain the product. The front forms the European Declaration of Conformity and the table on the reverse can be completed to form the inspection record.
Pocket Inspection Guide – This simple to follow pocket card identifies the key areas requiring inspection.

What training is required? (Competency):

Although in itself this is a simple item to use, there are three stages that should be considered as part of the process as a whole. Training is available for all the stages outlined at the SpanSet training school in Middlewich or subject to suitability on a site of your choice:

Assessment and planning – Training Module 9 Management of Work At Height

Use – Training Module 12 Evacuation from Height.

Inspection and Maintenance – Training Module 1 and Module 7 Competent Person Practical Inspection & Record Keeping.

All training for work at height is conducted in accordance with BS8454:2006 and is audited as part of our ISO9001:2008 quality management system.

For additional information on training please go to www.spanset.co.uk or Email: training@spanset.co.uk

What if I need to know more?
