

Product ID:
RGL14

Product Name:
Twin Leg Webbing Restraint Lanyard

The RGL14 Twin Leg lanyard is an industry standard for restraint lanyards, and normally the minimum equipment issued with a harness for working at height.

The 32kN webbing used in the manufacture provides greater strength compared to other webbing and systems. This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point. Movement between anchorages can be achieved by means of double clipping. This lanyard can be fitted with any compatible EN 362 connectors.

Only suitable as a restraint lanyard with no risk of a fall. Never use for fall arrest.

Accredited to:

EN 354:2010

Material:

26mm water repellent polyester 32kN

Fittings:

Supplied without connectors unless stated otherwise

Length(s):

1.3m - 1.8m
