

RGA2/EDGE

FALL ARREST BLOCK - 10M

The RGA2/EDGE is a multi purpose fall arrest block, which allows uninhibited movement during normal working activity.

The addition of a shock pack means this block can be used whilst working over the edge. However horizontal use or foot level attachment should still be discouraged as there is a risk of serious injury from striking objects.

The carrying handle is part of the cast alloy housing and can be connected to the anchorage point using soft slings or a connector.

For self-connecting to the block, it is recommended that the operative uses an extension strop (RGL4) in order to ease the task. The RGA2/EDGE is supplied with galvanised wire cable.

Accredited to: EN 360:2002
VG11.060

Line material: 5mm galvanised wire cable

Case material: Alloy

Shock pack material: Polyester

Connector: Double action high tensile steel swivel karabiner

Weight: 6.9kg

Max user weight: 140kg

Max force: <6kN

Built-in fall indicator

Shock absorber
