

DL5 Cable drum lug with locking lever

Working load limit (WLL) 5000 kg

Specifically designed for the transport of cable drums, these clamps are used in pairs together with a two-legged chain sling.

By the spreading of the clamp, it locks inside the drum.

The clamps can be held in place by a locking lever.

Easy handling, light-weight design, and the size of the clamp contribute to the safe transport of all types of cable drums.

Product group: I2
