

General Statement Of Conformity

01 / MANUFACTURER

NAME: NLG
ADDRESS: Units 1-2 Abbey Business Park
Poole, Dorset, BH16 6NN
United Kingdom

02 / PRODUCT

CODE: 101670
DESCRIPTION: Spin Tether™
LOAD RATING: 0.5 KG / 1.1 LBS

03 / TEST PROTOCOLS

The product described in (2) are in conformity with the provision and scope of our quality control and testing protocols set out in the PPE Regulation (EU) 2016/425 and Regulation (EU) 2016/425 (as incorporated into UK law) covering all PPE manufacturing, where such is the case, with the standard of fit for purpose design parameters. The above referred to Personal Protective Equipment (2) is identical to the equipment independently tested and certified by BSTL in accordance with EN 364:1992 test methods. Dynamic drop performance testing is conducted with a deviation to the specified weight in EN 364:1992. The test is conducted with a 2:1 weight safety factor of twice that specified by the manufacturer, for tool lanyards and tether points. Static strength testing is conducted at 7:1 weight safety factor for containers and storage equipment. Closure systems on lifting bags, when inverted are tested at 2:1 weight safety factor of twice that specified by the manufacturer.

04 / CONFORMITY

STANDARDS:
ANSI/ISEA 121-2018, CE / UKCA, NS
9611:2022+AC

05 / GENERAL

NLG products are rigorously tested to comply with relevant standards and in many cases surpass the required test standards. In the absence of a specific UK or European standard for tool tethering, all of our tethering products conform to EN 364:1992 test protocols with a modification of test weights as described in section (3). Tethering products are also tested and fully compliant with ANSI/ISEA 121-2018 and NS 9611:2022+AC:2022 where indicated. All of the NLG lifting bags conform to ANSI/ISEA 121-2018 and EN 1492-1 where indicated.

06 / AUTHORISED PERSON

INSPECTION

In addition to routine checks before each use, all equipment should undergo regular detailed inspections, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for a thorough inspection.
